

The Epicenter Advantage

We are a stewardship consulting company helping churches meet the financial challenges of expanding ministries and/or facilities. Our consultants are experienced planters, coaches and pastors who themselves have faced the financial challenges of growing ministry and developed the tools necessary to lead their congregations toward greater financial viability by focusing on these six things: prayer, intentional involvement of others, education, communication, expectation and increasing opportunities for financial support.

Our consultants don't take the center stage in their engagement with you, rather they train and resource the leaders of your local church to cast vision, inform, guide and invite their people to follow God's lead in offering their time, talent and financial resources to help God's dream become a reality for their church.

Epicenter Stewardship is designed to be a consultant supported, locally led and low cost process that is integrated into the already busy life of your church. We offer flexible resourcing created in partnership with you based on the unique cultural context of your church.
